스프링 부트 3.2 이슈

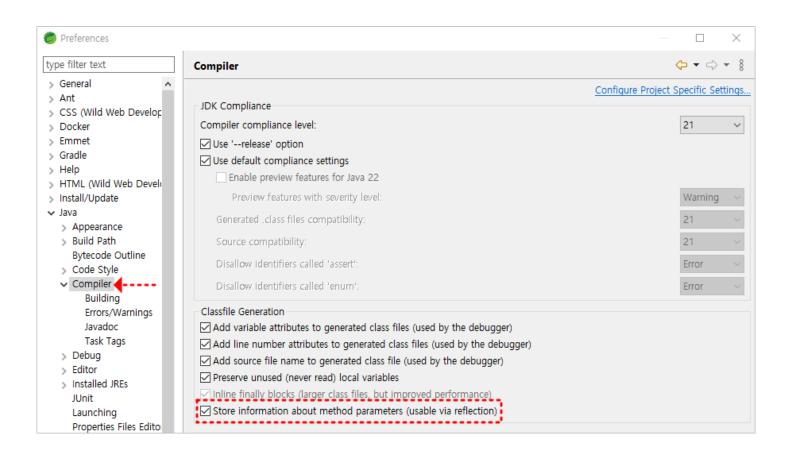

스프링 부트는 3.2부터 더 이상 바이트코드를 파싱할때 파라미터 이름을 추론하지 않는다고 한다. 그리고 의존성 주입 또는 속성을 바인딩 할 때는 -parameters 옵션으로 컴파일 했는지 꼭 확인하라고 한다.

이로 인해 발생하는 오류는 다음과 같다.

Cannot resolve parameter names for constructor

해결 방법은 이클립스에서는 다음과 같이 설정하면 된다.

상단 메뉴 ⇒ Window ⇒ Preferences ⇒ Java ⇒ Compiler ⇒ Store information about method parameters (usable via reflection) ⇒ 체크
